- Seat height adjustment is important in setting the proper hand position and allowing for proper sitting eye height as well.

Seat Depth Adjustment

Feature

- Optional seat depth has 3" (76mm) seat depth range. Fixed seat also available.

Benefit

Seat Height Adjustment

Fully Retracted

Fully Extended

Features

- Pneumatic seat height adjustment.

- Dual Posture seat height adjusts 17.5" to 24.2" (445mm to 615mm).

Seat Height Adjustment

Fully Retracted

Fully Extended

Features

- Pneumatic seat height adjustment.
- Task chair seat height adjusts 5" (127mm) from 16" to 21" (406mm to 533mm) in standard models. Low-position adjusts 14.7" to 18" (373 to 457mm).
- Task stool seat height adjusts 7.3" (185mm) from 21" to 28.3" (533mm to 719mm).
- Dual Posture adjusts 17.5" to 24.2" (445mm to 615mm).

Benefits

- Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat pan is too low.
- Accommodates for users between approximately 4'11" (1499mm) and 6'3" (1905mm) tall to provide good leg circulation.
- Seat height adjustment also is important in setting the proper hand position and allowing for a proper sitting eye height.

Seat Height Adjustment

Fully Retracted

Fully Extended

Features

- Pneumatic seat height adjustment.
- Task chair seat height adjusts 5" (127mm) from 16" to 21" (406mm to 533mm) in standard models. Low-position adjusts 14" to 17" (356 to 432mm).
- Task stool seat height adjusts 7.5" (191mm) from 21.5" to 29" (546mm to 737mm).

Benefits

- Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat pan is too low.
- Accommodates for users between approximately 4'11" (1499mm) and 6'3" (1905mm) tall to provide good leg circulation.
- Seat height adjustment also is important in setting the proper hand position and allowing for a proper sitting eye height.

Balanced 3-point Tilt

Features

- Back reclines 20° from the upright position.
- Seat pan moves downward 3° from the initial position.
- 2:1 recline ratio.

Benefits

- Comfortable relaxed posture.
- Recline allows for the opening of the users' chest cavity providing good airflow to promote alertness.
- Users' feet remain flat on the floor.

Tilt Tension Control

Feature

- Easy-to-reach and easy-to-activate side-mounted unlimited tilt tension control regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards.

Benefit

- Personalized support to accommodate users of different body types and different work styles.

Seat Height Adjustment

Features

- Pneumatic seat height adjustment.
- Seat height adjusts 5"(127mm) from 16" to 21"(406mm to 533mm) in standard models. Low-position adjusts 14" to 17"(356 to 432mm).

Benefits

- Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat pan is too low.
- Seat height adjustment also is important in setting the proper hand position and allowing for a proper sitting eye height.

Seat Depth Adjustment

Feature

- 3"(76mm) of seat depth range.

Benefit

- Supports the thighs, allows users to rest against the seat back for back support, and avoids pressure on the back of the knees of small to tall users.

Very Task

At-A-Glance — Optional Mobility and Adjustability

- Height adjustment accommodates for users with varying elbow rest heights so that users avoid lifting their shoulders or leaning sideways to get arm support.
- Front-to-back adjustment adjusts the armrest length, which is important because it allows users to get close to the worksurface while maintaining the effective use of the backrest.

- Pivoting provides proper support of the forearm when performing tasks involving keying and mousing.

Environmental Factors

Material Off Gassing

In an effort to ensure air quality standards, all Improv parts suppliers are required to provide Material Data Sheets and/or other documentation, verifying that their products do not emit volatile organic compounds (VOCs). In addition, the powder-coat paint process used in the manufacturing of Improv seating is free of VOCs. Our manufacturing processes have also eliminated all use of chlorofluorocarbons (CFCs) and ozone depleting chemicals (ODCs) in the chair's construction.

Recycling

All fabric scraps are recycled, reducing the amount of material sent to landfills, and all chair components disassemble easily to increase the potential for recycling. In addition, all thermo-plastic parts are 100% reprocessible, and all raw materials used in its manufacturing can be recycled at the end of the useful life of the product. Recyclable parts are identified with the recycle symbol where practical.

Finishes and Fabrics

A complete listing of finishes and fabrics for Improv desk chairs can be found in the back of the price list.

COM & COL General Information

To order a COM fabric (Customer's Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to haworth.com/surfaces to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.

The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.

Fabrics and Finishes

A complete listing of fabrics and finishes for Riverbend and Pebble is available in the back of the price list. Fabric is applied Railroaded to both Riverbend and Pebble products. Linear or patterned fabric is not recommended due to the manner in which fabric is applied. Material will not be pattern matched.

Riverbend sofas and Pebble ottomans feature large, flat surfaces, and textile crispness will be influenced by the amount of stretch in each textile. Some textiles will stretch more than others, resulting in a small amount of pooling. This can be addressed by running a hand across the surface to smooth the material.

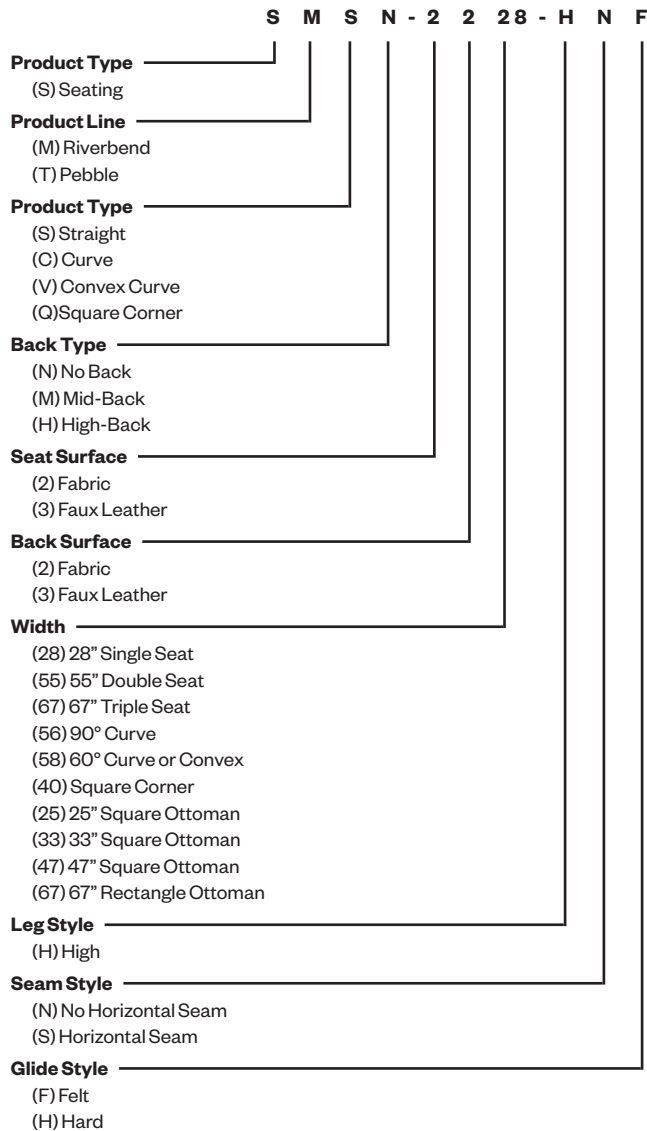

Stain Repellent

To specify add **"P"** to end of the product number.
Example: SMSN-2028-HNFP

Designed for use by individuals up to 325 lbs.

Seam Options

No Horizontal Seam

Horizontal Seam

Riverbend units are available with and without a double-needle stitch horizontal seam.

When specified without horizontal seams, textiles will gently flow over the front and back edges of the seat and back, providing a simple and seamless aesthetic.

For a tailored aesthetic, Riverbend units can be specified with a horizontal seam along the front and back edges of the seat and back.

Ganging Bracket

Ganging brackets are used to gang one Riverbend component to another. When not in use the ganging bracket pivots to hide under the seat. Each Ganging Bracket Kit includes two brackets, screws, a template and assembly instructions. One kit will gang two sofas together.

Power Module

The separately specified power module provides under seat power consisting of either one or two simplex outlets (NEMA-5-15R) and one dual USB A-C. (20W shared between A and C). The Power Module must be installed along the front edge of the Riverbend seat. Power Modules may not be daisy chained together.

The Power Module is available either corded or hardwire with a 6'(1829mm) or 12'(3658mm) cord.

Included with the module are two cord management clips and attachment hardware.

Application may require approval from local authority having jurisdiction (AHJ); ensure compliance before placing orders and installing.

Fabric

Linear or patterned fabric not recommended due to the manner in which the material is applied.

Because of the nature of the chair, materials that have more fibers or woolen spun yarn construction, such as Cotswold, tend to upholster well on Poppy. Synthetic fibers, or textiles with heavy back coatings, tend to be more difficult to upholster and consequently may restrict some COMs.

Designed for use by individuals up to 325 lbs.

Because of the natural properties of wood, variations of grain pattern and finish color can be expected. Haworth carefully selects materials used in the manufacturing of products to promote consistent and acceptable color. Wood is susceptible to color change from exposure to UV rays. Haworth finishes include a UV stabilizer to reduce these effects.

Natural finish on Maple is a clear coat only and will show all the characteristics of the wood.

Compatible wood finish color will complement wood casegoods finish color, not necessarily wood species characteristics.

Note:

- Specifying a common stain color for casegoods, wood seating, and wood occasional tables will result in a suite of furniture which has a commercially acceptable finish match.
- Different wood species are offered on the various casegoods, chairs, and tables. Each species offer unique texture, grain, and color of raw wood and veneer. Minor variations in finish color and texture may occur due to these natural characteristics of wood. This is part of the natural beauty of wood and is not considered to be a defect.

Forest Stewardship Council® (FSC®) Statement:

In our continuing support of sustainable forestry and responsible purchasing, Haworth North America is offering FSC certified wood products at no up-charge. By providing FSC certified material, Haworth is supporting our client's green building goals and demonstrating our collective commitment to source materials more sustainably. Haworth will provide to you the necessary FSC certified paperwork with your shipment. For more information, FAQs, and a complete FSC product list (including product exceptions), go to the Library and search FSC. Haworth FSC Trademark License #FSC-C002821

Product Compatibility and Limited Warranty Policy

Great Expectations

You have them as a Haworth customer and so do we. And because we value our customers, we cover our products with the Haworth North America Product Compatibility and Limited Warranty Policy.

Our Commitment To Product Compatibility – Integrated Product Platforms

As a market leader in the design and manufacture of workspaces that adapt to change, we strive to maintain product compatibility within our various generations of integrated product platforms. This benefits the customer who desires to update or modify their work environment. It also benefits the customer needing to replace a product due to damage or other reasons but which is no longer manufactured or is otherwise unavailable, such as a fabric or finish that is discontinued because of changing market preferences. In both circumstances, we often can provide products with comparable function and performance.
